Guardians, 2023

# A garden of forking path

Start

The Graden of Forking Paths  
*By Jorge Luis Borger*

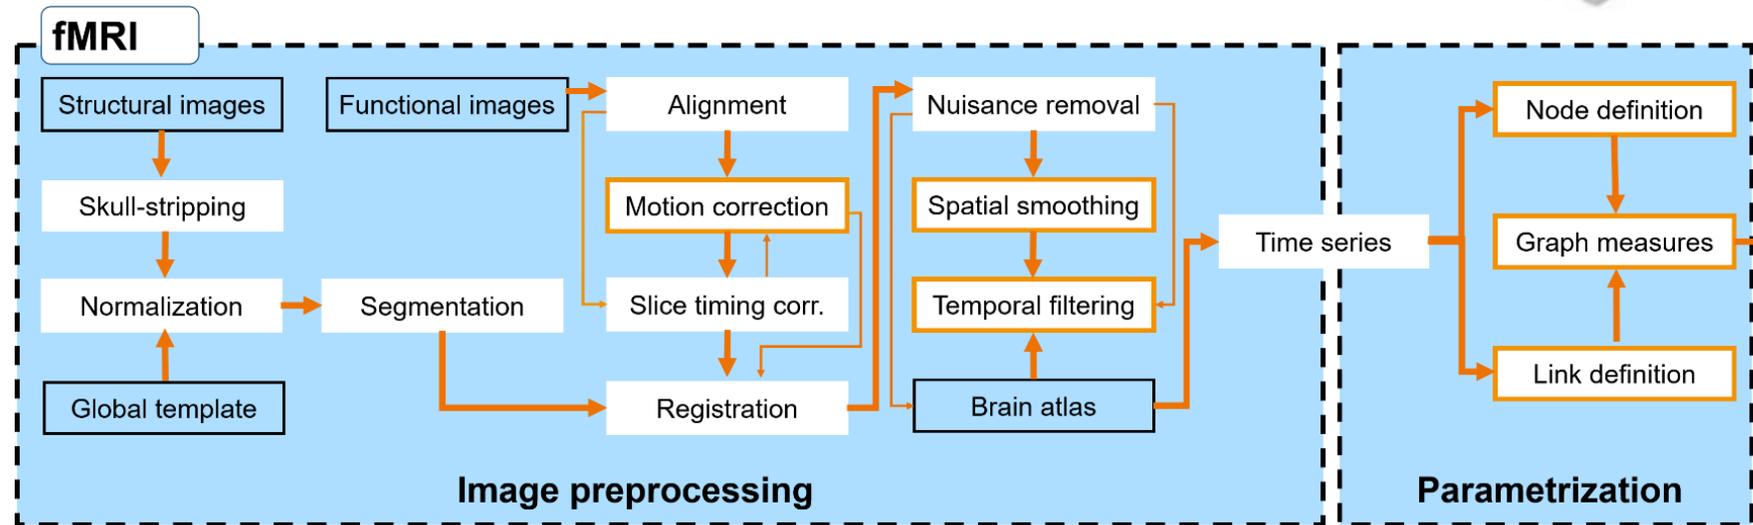

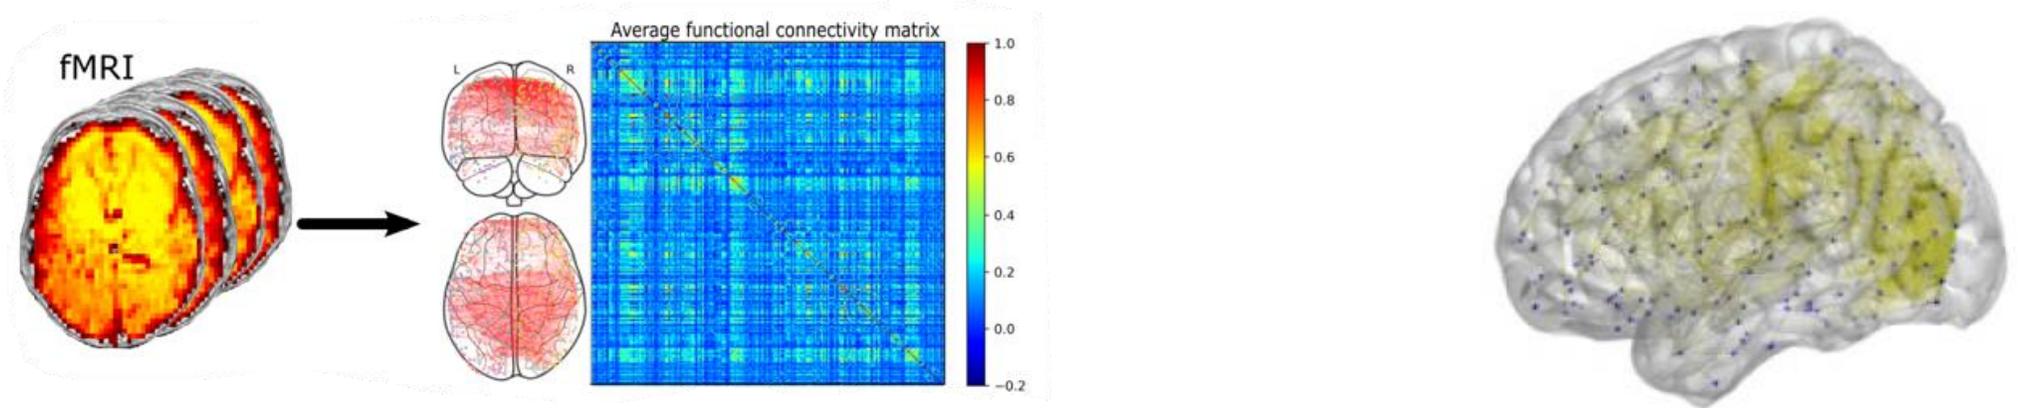

...

- Every methodological decision creating a unique forking path (universe) is potentially impactful
- A group of the forking paths (universes) creates a **multiverse of potential analyses** ranging from the raw data to the outcome of a statistical association

Room for advancement, because:

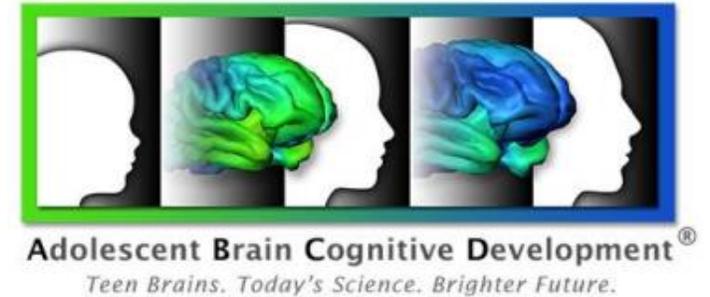

1. The output of each pipeline or forking path must be a vector;
2. The predicted variable is single value observable;
3. There is only a static visualization of the multiverse of analysis results.

# An extended active learning approach

## Predicting a latent variable reflecting attitudes towards alcohol by using fMRI-based graph measures

### The forking paths

Negative correlation	Threshold	Edges	Measures
Absolute	0.5	Weighted	Strength
Keep	0.2	Binarized	Betweenness centrality
Zero	0.01		Clustering coef.
			Eigenvector centrality
			Local eff.
			Global eff.
			Modularity
			Participation coef.

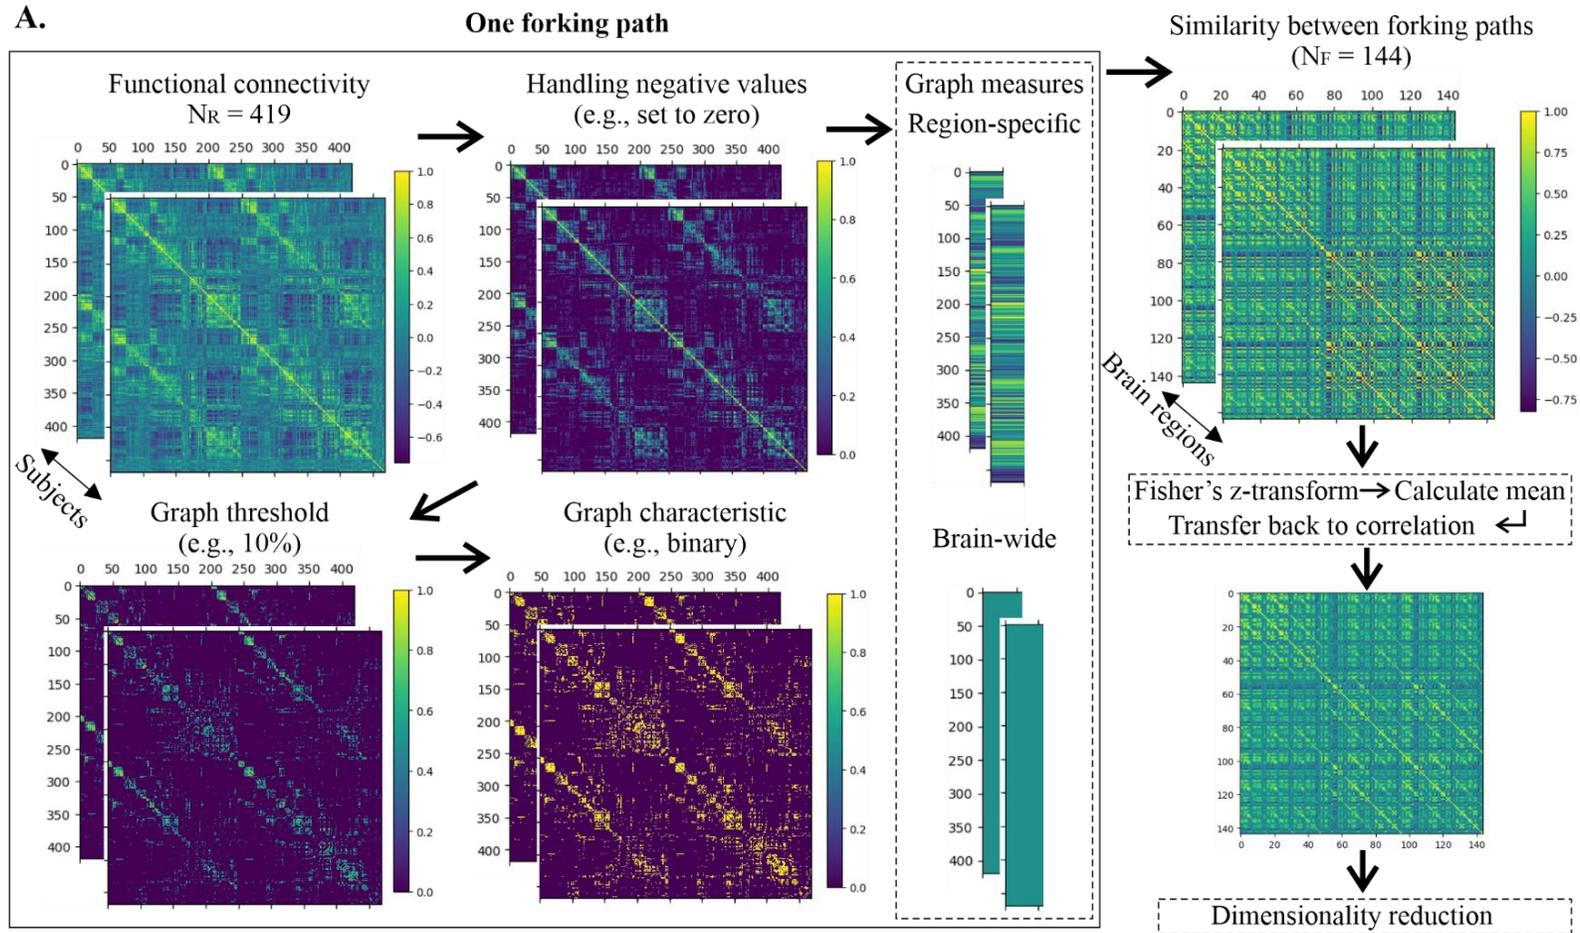

$N = 838$  adolescents

A total of 144 forking paths

# Implementing the forking paths

## Results – The interactive visualization

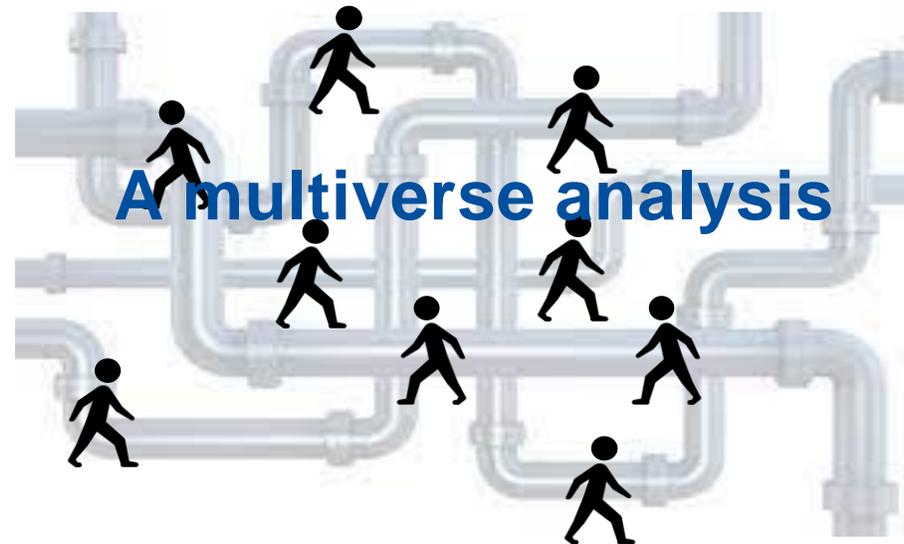

Shiny App Demo: <https://meteor-oldenburg.shinyapps.io/BrainSubstance/>

## Final remarks

We extended the previously proposed active learning-based approach to aid the implementation of multiverse analysis by:

1. Developing a search space which can handle both vector and single value output from each forking path;
2. Integrating Structural Equation Modeling to allow the prediction of a latent variable;
3. Visualizing the multiverse of analyses results in an interactive way.

**Test the robustness**  
**Explore the unexplored**

**It is a dangerous  
place**

ABCD Youth Alcohol Measures (abcd_yam01)	aeq_section_q01	Alcohol helps a person relax, feel happy, feel less tense, and can keep a person's mind off of mistakes at school or work.	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q02	Alcohol can help how well a person gets along with others (makes people want to have fun together).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q03	Alcohol can hurt how well a person gets along with others (makes people mean to others).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q04	Alcohol helps people think better and helps coordination (people understand things better; can do things better).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q05	Alcohol hurts how people think and it hurts their coordination (run into things, act silly, have a hangover).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q06	Alcohol makes a person feel stronger and more powerful (easier to fight, speak in front of others, stand up to others).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'
	aeq_section_q07	Alcohol can make people more careless or do things that could get them into trouble (do things they feel bad about; do things they regret).	1 = Disagree Strongly; 2 = Disagree Somewhat; 3 = Uncertain; 4 = Agree Somewhat; 5 = Agree Strongly / tlfbc_alc_l == '1'    tlfbc_alc_c_l == '1'

```
