Alan M. Garber, MD, PhD

Honoring Dr. Alan. M. Garber

BHAVI 2025 Guardian of Truth and Integrity: We honor and thank Dr. Garber as our 2025 Guardian in recognition of his commitment to truth and integrity in science and medicine, and his extraordinary devotion to teaching and learning with leadership as President of Harvard University. As a physician, scientist, economist, and public health advocate during his lifetime of work in support of public health, health care policy and the public good, Dr. Garber provides true leadership of the best kind possible with his clarion call for the defense of civil liberties, freedom of speech, academic freedom, intellectual freedom, and the rights of private institutions to engage in the practice of science and medicine, and of education and research, without illegal interference from other persons or agencies in violation of the constitutional rule of law. His defense of freedom, democracy, and decency must be supported by all of us as American citizens who believe in *civility, courtesy, tolerance, and respect for people talking to people and scholars listening to scholars.*
